

Modev8 Intro Session

Welcome to Modev8 where we will work together to create something wonderful. We are a team and we want to see our students have the opportunity to take full advantage of time with us. We strive to develop the motor skills necessary to obtain regulated and accurate communication that does not allow for scrutiny towards and during the process or towards the student once they are at the open level of communication. We promise to do our part to use the skills that we have attained for these programs Tuned Motor Development techniques to allow for consistency and a strong build of body skills. During your intro session you will have the opportunity to tour the facility, meet some of the Modev8 team and start to build a communication practice schedule for your student with innovative and structured individualized needs. We have put together an Intro session walk through to help make your first visit as comfortable as possible. Please let us know if you have any questions or concerns.

What to expect during your Intro session at Modev8 Programs:

You will receive a REMIND text thread designed for your student. (Please follow the keys to success guidelines to activate and use your link)

Upon arrival you will be greeted by our friendly Modev8 team.

Your student will meet their team and go into an intro session.

Your student will be recorded doing their first Spelling to Communicate session with one of our practitioners for you to view later (uploaded within 48-72 business hrs.) along with a transcript of what was spelled in the session and other notes from the practitioner.

The initial evaluation will be between 1 hour to 1.5 hours. Recommendations will be given by the Practitioner, as they build relationships, work through sensory needs and start to have a sense of how to build a regulated coaching environment for the students future sessions.

It is very IMPORTANT that the Modev8 staff has focused time with the student during this session. This includes all regular loops, distractions and people as removed as possible to help students stay in optimal learning state of regulation. Some elements that may add to a students dysregulation are:

- *They may want to over perform for others in the room.*
- *They may be excited, overjoyed, scared, overwhelmed or overall emotional on any or all levels.*
- *We follow a lesson format for structure that even when not evident, the practitioner is using to get to know the student's individual needs. It may throw the session off if others are talking about them, to them or for them during sessions.*
- *Loud sensory toys that can cause looping including i pads and devices. If possible please leave in the car. If not we will work on putting those aside with our trained motor coach to assist this be done in a calm way still allowing for them to use it for comfort on the way in for beginning sessions.*
- *Snacks and drinks other than water (unless otherwise needed) should be left in the car.*
- *Edification is awesome but not for every letter and poke. Our students feel our excitement even if we try not to show it. You WILL be super proud of them for EVERY letter and poke and it is best if you can enjoy that together while reviewing film. Excitement during a session may add to dysregulation even if it is due to good emotion.*
- *On that note, our students can also feel our fear, anxiety, doubt and worry. We are here to help relieve you from those emotions and bring back hope, peace and assurance as we move forward in your new journey of communication and quality.*
- *We BELIEVE in our students and are excited to be on this journey with you and your family.*

During this time Parents will:

- *Receive a brief comfort walk through of the facility.*
- *Sit with another Modev8 team member to help answer your questions and concerns.*
- *Have time to schedule students' initial assessment session or pick out a session schedule.*

What to expect from Modev8 Programs:

- *An innovative approach to help the student succeed according to their individual sensory organization input needs and motor profile.*
- *At least 30 minutes of desired program.*
- *Trained staff with your full interest in mind.*
- *A staff that works alongside the families needs and goals.*
- *A community surrounding the student with competence, respect and love.*
- *An Innovative individualized plan for your child*
